## VanEck FTSE Global Infrastructure (Hedged) ETF

## Fund Description

VanEck FTSE Global Infrastructure (Hedged) ETF invests in a diversified portfolio of infrastructure securities listed on exchanges in developed markets around the world with the aim of providing investment returns (before Management fees) that closely track the returns of the FTSE Developed Core Infrastructure 50/50 Hedged into Australian Dollars Index.

The FTSE Developed Core Infrastructure 50/50 Hedged into Australian Dollars Index comprises securities in developed countries which provide exposure to core infrastructure businesses, namely transportation, energy and telecommunications, as defined by FTSE's International Benchmark Classification.

Only companies with at least 65% of their revenue attributable to core infrastructure activities are included. The weight of each company is then capped to limit the exposure to particular infrastructure subsectors as follows:

- 50% Utilities;
- 30% Transportation; and
- 20% Others eg Pipelines

Individual stocks are capped at 5%

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, currency hedging, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.
