The table above shows past performance of the ETF from 29 April 2016. Index performance shown prior to 2 March 2015 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

### Key risks

An investment in our global infrastructure ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, currency hedging, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index.
