

VanEck Australian Resources ETF

MVR gives investors exposure to a diversified portfolio of ASX-listed resources companies. Australian Resources ETF aims to provide investment returns, before fees and other costs, that track the performance of the Index.

MVR

Benefits

Diversify across Australian resources

Invest across the range of Australia's resource companies including BHP, Rio Tinto, Woodside and more, in one trade on ASX.

Benefit from Australia's international trade

Resource companies leverage off Australia's international trade partners including growing nations such as China and India and more developed countries such as USA and Japan.

Tactical exposure

Targeted investment position to one of the pillars of Australia's economy and our major exports.

The table above shows past performance of the ETF from 14 October 2013. Index performance shown prior to 21 December 2012 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher. The S&P/ASX 200 Resources Index is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of the resources companies included in the S&P/ASX 200, weighted by market capitalisation. MVR's index measures the performance of the largest and most liquid ASX-listed companies that generate at least 50% of their revenues or assets from the Australian resources sector, with a maximum weight of 8% in each company at rebalance. Consequently it has fewer companies and different industry allocations than the S&P/ASX 200 Resources Index.

Key risks

An investment in our Australian Resources ETF carries risks associated with: financial markets generally, individual company management, industry sectors, stock and sector concentration, fund operations and tracking an index. See the VanEck Australian Resources ETF PDS and TMD for more details.
