

QSMML

VanEck MSCI International Small Companies Quality ETF

Fund Description

QSMML gives investors a diversified portfolio of 150 international developed market small-cap quality growth securities. QSMML aims to provide investment returns before fees and other costs which track the performance of the Index.

The MSCI World ex Australia Small Cap Quality 150 Index measures the performance of the 150 largest international quality small-cap growth companies selected from the MSCI World ex Australia Small Cap Index at rebalance. Quality companies are identified on the basis of a quality score determined by three key factors:

1. high return on equity;
2. stable year-on-year earnings growth; and
3. low financial leverage.

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

The tables above show past performance of the ETF from 8 March 2021. Index performance shown prior to 15 February 2021 ("Launch Date") is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

The MSCI World ex Australia Small Cap Index ("MSCI World ex Aus") is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of developed market small-cap companies, weighted by market capitalisation.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted harmonic average of each portfolio security's distributed income during the prior twelve months before Management fees.
